ABOUT ME

I'm a fullstack developer with a strong focus on backend development using Go and Python, building APIs and services with an emphasis on clean code, maintainability, and practical system design. I have experience working with React and TypeScript on the frontend, alongside backend systems built with FastAPI and Fiber. I'm comfortable working with PostgreSQL, Redis, Docker, and Kubernetes in modern development and deployment workflows. I'm familiar with collaborative engineering practices such as code reviews, version control, and team-based development. I'm particularly interested in building scalable web applications, backend systems, and reliable software architectures.

LANGUAGES

Catalan: C1

Spanish: C1

English: B2

French: A1

SKILLS

Frontend:
TypeScript.

Backend:
Go and Python.

Frameworks & Libraries:
Fiber, FastAPI, React and Tailwind.

Databases:
PostgreSQL and Redis.

DevOps:
Git, Docker, Cloudflare, Kubernetes and Sentry.

CERTIFICATES

2025 - Python Developer
Sololearn

2025 - SQL Intermediate
Sololearn

EDUCATION

Secondary Education

2023 - 2026 | Institut Santa Eugènia
